RADIANT WITH REWARD

Meet Europe's smartest
energy-efficient radiant heater.

The latest European design meets the newest
energy saving innovations. Atlantic brings you
Tatou: your smart and stylish radiant heater.

Experience the best of both worlds —
unsurpassed comfort with exceptional energy
efficiency. Featuring the latest technological
advances in intelligent motion, light and draft
sensors, Tatou warms your space and your heart.

✦ MOTION SENSOR

When no motion is detected for over 30
minutes, Tatou responds by turning itself down
by 2°C then automatically resets when motion is
detected again.

✦ LIGHT SENSOR

Tatou responds when it's lights-out time. The
heater automatically turns down by 2°C then
resets when the lights are switched back on.

✦ DRAFT SENSOR

When a rapid drop in temperature is detected,
Tatou switches to standby then returns to heating
automatically when air temperature stabilises.

✦ CONSUMPTION INDICATOR

Monitor Tatou energy use as you go — you'll like
what you see.

✦ PROGRAMMABLE

Time to farewell timers and welcome Tatou's
press of a button pre-set programs.

TATOU FEATURES

- Rapid heating
- World class design
- Anti-dust technology

Breakthrough energy efficiency

You don't need to sacrifice energy efficiency for luxurious heating comfort. Tatou drives down energy consumption to breakthrough lows. Meet the new generation 'black body' radiant plate element — an exclusive Tatou feature that replaces the traditional finned electric element found on convection panel heaters. Tatou's 'black body' plate technology means only 80 watts per square metre of room area is recommended when sizing a heater. Compare this with the 100 watts per square metre recommended for traditional panel heaters.

New Black Body Radiant Element

Traditional Finned Convection Element

Radiant heating is reward itself, offering all the comforts of a log fire. Now that's a superior level of ease that classic convection heating struggles to match.

Specifications

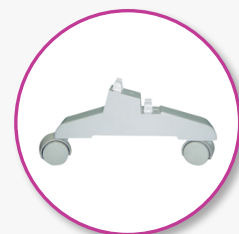

- Digital temperature display
- Energy consumption indicator
- Inclusion of wall bracket
- Three set programs options 24x7
- Eco mode for ultra energy efficiency
- Electronic thermostat sensors every 40 seconds to 1/10°C
- 7 year warranty

Safety

- Child-safe surface temperature
- Lockable control panel
- Asthma and allergy friendly with premium anti-dust process
- Automated safety cut-off feature
- Splash proof
- Silent

Options

- Optional feet and castors

Tatou Dimensions

Rating (W)		Depth (mm)	Width (mm)	Height (mm)	Room Size
